

R E M A R K S

Claims 1-6, 8-14, 17 and 19-20 are pending in this application. The Examiner is respectfully requested to reconsider and withdraw the rejection in view of the remarks contained herein.

Claims 1-6, 8-14, 17 and 19-20 stand rejected under 35 U.S.C. § 102(e) as being anticipated by Kobayashi, U.S. Patent No. 6,633,759 ("*Kobayashi*"). This rejection is respectfully traversed.

Independent claims 1, 9 and 17 have been amended hereinabove to more clearly identify a novel feature of the presently claimed invention, i.e., that the "information about the interface client includes at least information about display capabilities of the interface client including at least one of visual display size and visual graphical display characteristics" (emphasis added). With regard to claim 1, *Kobayashi* fails to show, teach or suggest such information about the interface client. The portions of *Kobayashi* as cited by the Examiner merely disclose that the user of the PC 1 can receive (1) electric field intensity information (e.g., wireless signal strength information) for a wireless link between the cellular phone 2 and the local cellular phone station 3 or (2) battery information of the cellular phone 2. Nowhere is it seen mentioned that information about visual display characteristics of the interface client is available or provided.

Accordingly, Applicants respectfully request reconsideration and withdrawal of the rejection of claim 1. It is respectfully submitted that independent claims 9 and 17 are allowable for at least similar reasons as claim 1. Therefore, reconsideration and withdrawal of the rejection of claims 9 and 17 is also respectfully requested.

Claims 2-6, 8, 10-14, 19-20 each ultimately depend from one of claims 1, 9, and 17 and are allowable for at least similar reasons, as well as for having further novel and non-obvious subject matter. Therefore, reconsideration and withdrawal of the rejection of claims 2-6, 8, 10-14, 19-20 are also respectfully requested.
